

## DF Drywall Tape

### DF Drywall Tape

The **DF Drywall Tape** is made of self-adhesive compound which helps in speeding up the taping procedure. The tape is laid flat on the surface of the drywall and due to its properties it gets stuck to the drywall smoothly. The use **DF Drywall Tape** is highly beneficial as it gives elasticity, protection against mold and a smooth finish.

Product Description	Width	Length	Weight per Nos
DF Drywall Tape	50 mm (+/-1)	90 M	285g (+/-10g)

### Features

- Better Elasticity
- High Tensile Strength
- Quick, simple & time efficient
- Great Self-Adhesive properties
- Creates smooth finish without any blisters

### Installation Guidelines

**DF Drywall Tape** comes in rolls of 90m and 70m. The self-adhesive compound makes it very simple to use. Uncover the fiber tape with a utility knife then, Press the fiber tape on the drywall surface so it spans the joint and lies flat against the wall starting at one end of the seam. After the fiber tape is stuck on the surface apply the Jointing Compound on the fiber tape to make sure it is crack free and has a smooth finish.
